

## **World Patent Marketing Review Committee Approves Warning Sign, A New Safety Invention That Warns Motorists Of New Drivers On The Road**

*World Patent Marketing Reviews A New Safety Invention. Will Warning Sign Be the Next World Patent Marketing Low Cost Success Story?*

Miami, FL ([PRWEB](#)) July 10, 2016 -- World Patent Marketing, a vertically integrated manufacturer and engineer of patented products, announces the Warning Sign, a safety invention designed to inform regular drivers to be patient on the road when encountering first time drivers and the elderly.

"The Car & Automobile Manufacturing market in the U.S. is worth \$127 billion," says Scott Cooper, CEO and Creative Director of World Patent Marketing. "Strengthening economic conditions and returning consumer confidence will continue to fuel the industry in the next five years."

"People nowadays seem to be very impatient and would constantly honk on other vehicles while driving," says Jerry Shapiro, Director of Manufacturing and World Patent Marketing Inventions. "The Warning Sign is a safety invention which informs drivers to be more patient while driving alongside or behind first time drivers and the elderly."

The Warning Sign is a safety invention designed to provide safety measures to regular motorists as well as to persons who are still learning how to drive. It was created with great thought and care to ensure that it is successful in providing a effective means to warn or inform drivers to be careful while driving in certain places. What this does is provide a safe and secure way for first time drivers to practice their driving skills without fear of accidentally bumping into a fellow driver. In addition to this, it would be useful for people who are not familiar with certain areas and even provide the elderly to drive with great caution. The Warning Sign is a simple invention but definitely highly effective.

"This product was created to keep new drivers, and those around them safe. Whether it's your teenager learning to drive, a new driver to your region or elderly people, this easy to use product will help keep them, and other drivers safe at all times," says inventor Daciana L. "I created this safety invention because as a mother of a teenage driver, I want to be able to help her, as well as other motorists to be safe on the road as she learns how to drive. It is also a great way to drive as safely as possible when in new areas."

Felicity Adams, a mother of a teenage son from Los Angeles, California, has this to say about the Warning Sign: "As a mother of a son who recently got his license, I am a bit worried that he still has to learn so many things about actually driving. Thankfully, the Warning Sign is there to inform other drivers to be more patient when they see my son on the road."

The Warning Sign is a safety invention designed to inform drivers to be more patient with first time drivers and the like while on the road.
