

The Newest Performance Products Now Available at Summit Racing Equipment

Summit Racing now carries its own brand of Rod Builder Exhaust Kits plus TurboSmart Blowoff valves for turbocharged engines and Earl's Performance UltraPro Hose and Hose Ends.

Tallmadge, OH ([PRWEB](#)) July 08, 2016 -- Summit Racing now carries its own brand of Rod Builder Exhaust Kits plus TurboSmart Blowoff valves for turbocharged engines and Earl's Performance UltraPro Hose and Hose Ends.

[Summit Racing Rod Builder Exhaust Kits](#)

There are plenty of street machines, hot rods, weird engine swaps, and other vehicles that require a custom-made exhaust. Now car builders can make their own custom-fit exhaust system with a Rod Builder Exhaust Kit. All of the components are made from 304 stainless steel and are available with 2.25, 2.50, or 3 inch tubing.

[Turbosmart Universal Blowoff Valves](#)

Compressor surge—the fluttering sound heard as the turbo compressor tries to push excess air against a closed throttle body—is why turbocharged engines need a Turbosmart blowoff valve. Its job is simple—vent unwanted boost pressure. That helps extend turbo life by decreasing the load on the bearings. It will also keep the turbo spooled up when the throttle is closed, like between gear shifts.

[Earl's Performance UltraPro Hose and Hose Ends](#)

Earl's UltraPro Hose and Hose Ends were designed from the ground up for the brutal vibration, flow requirements, and extreme fluid pressures of modern high performance. They are rugged, lightweight, and are impervious to all known fuels, oil, and coolants.
