

InventHelp Invention Facilitates Cleaning and Detailing of Vehicle Wheels (AAT-1843)

Founded in 1984 in Pittsburgh, InventHelp is submitting the BLING RING to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) July 29, 2016 -- An inventor from Calhoun, Ga., cleans and details his own vehicles, as well as others' vehicles, and he's always looking for an effective way to avoid having to clean wheels twice because of overspray.

To meet this need, he designed and created a prototype of the easy-to-use, patent-pending BLING RING, which provides an easier way to clean and detail vehicle wheels. It avoids the hassle of overspray, which eliminates the need to clean the wheels twice. Overall, it saves time and effort. Producible in different colors, it's suitable for car detailers, car washes and DIYers.

The original design was submitted to the Atlanta office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-AAT-1843, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
