Vehicletrack.com teams up with Cellemetry® to offer low-cost vehicle tracking products and services

Vehicle tracking solutions at an affordable low-cost monthly rate using Cellemetry®

San Diego, California, October 16, 2002 □ Vehicletrack.com, a leading retailer and distributor of vehicle tracking products and services, is joining forces with Cellemetry® to offer low-cost vehicle tracking solutions.

Cellemetry's® patented technology uses the □non-voice□ or control channels of cellular systems to provide two-way, machine to machine (M2M) wireless data connectivity for a variety of communications that remotely monitor, measure, or track fixed and mobile assets.

Cellemetry's® technology along with the products and services offered by Vehicletrack.com create a low-cost vehicle tracking solution affordable to those with a small budget in mind. Security and safety have increasingly become important words in our everyday lives and now you can provide your family, business, or employees greater peace of mind, security and safety at costs affordable to just about anyone.

□We□re excited about this new technology and the ability to make vehicle tracking more affordable□ said Ken Clark, Vehicletrack.com CEO.

In 1999, Vehicletrack.com, a division of Peak Wireless, Inc., was launched to create a simple fleet and vehicle management solution for small to large businesses. The company has integrated its software with CDPD for dispatch and fleet management clients. In 2001, the company helped develop an AVL modem to be used on the iDEN network. In 2002, with the addition of Cellemetry® Vehicletrack.com continues to help bring vehicle tracking solutions to market and now at a low-cost rate making it more affordable.

Vehicletrack.com offers a wide selection of AVL (Automatic Vehicle Location) and GPS (Global Positioning System) products and services. These products and services can be customized to meet the needs of almost anyone. For more information on Vehicletrack.com and Cellemetry®, contact Ken Clark 760.739.1540 ken@vehicletrack.com or visit our web site at www.vehicletrack.com
