

Finally A Revolutionary New Way For Trucking Fleets To Increase Miles And Profits Per Day

(Los Angeles, CA) Jesse Johnson, President & Chairman of Pit Stop Incorporated, a businessman and former trucker, has developed and patented a product that is designed for truckers or motorists (Male and Female) who want a sanitary, and convenient way to urinate.

([PRWEB](#)) August 27, 2002 -- Because bathroom habits are sometimes an uncomfortable topic of discussion, this problem has never been addressed, until now. The New Product is called "The Pit Stop" and carries a suggested retail price of \$99. "The Pit Stop" is currently in production, and will be available from Pit Stop Incorporated by early October 2002.

This product can be inexpensively installed in truck fleets; however, it is just as convenient for the individual trucker. Mr. Johnson commented, "The Pit Stop will be widely accepted. Any trucker that gets paid by the mile knows how costly and inconvenient a truck stop can be. With The Pit Stop, drivers promptly get back on the road, so they can make more money."

"Because this product is so versatile and cost-effective, interest is being generated by individual drivers, trucking fleet executives, and even government regulators" said Jesse Johnson. "Current legislation (Oregon House Bill 3530), proposed by Rep. Rob Montgomery (R), and Rep. Mike Lehman (D), shows government interest as well"

Pit Stop enables truckers to have more comfort, safety, and peace of mind to enjoy the ride.

With The Pit Stop is a truck mounted urinal system. It is spill-proof, leak-proof, odor resistant, and has replaceable liners for a sanitary, germ free experience. This product is available for purchase at www.pitstopinfo.com

Editors Note: Jesse Johnson, the inventor, is available for further interview.
