For Immediate Release
9/16/02

Chicago... United Arab American League, UAL, expressing a great concerns over the past events in Florida, in which apparently Arab/Muslim passengers have made some inflammatory remarks concerning September 11 tragedy.

Although it appears to be that no crime has been committed, the United Arab American League wishes to affirm the fact the Arab Americans have mourned the tragedy along with millions of other Americans, and in full support of efforts to prevent any harms done to the Homeland

"we support our government to be vigilant in protecting the homeland and protecting its citizens" said Ali Alarabi, President of the League

We call on all Americans to be vigilant and on the lookout for any possible terrorist connections. But its disheartening to know that the vast majority of reported "suspicious activities" have been found groundless and made against innocent Arab and Muslim Americans going about their own daily lives.

End
