

## **Inventor and InventHelp Client Develops Improved Vehicle Security System (IPL-249)**

*Pittsburgh-based InventHelp is submitting Visions Cameras to companies in the hopes of a good faith review.*

PITTSBURGH, PA ([PRWEB](#)) September 17, 2016 -- "Security systems today are still based on old technologies that are no longer effective at stopping thieves from stealing vehicles," said an inventor from Indianapolis, Ind. "I devised this improved security system in order to make the best possible use of modern technology to stop crime."

He developed the patent-pending VISIONS CAMERAS to stop thieves, vandals and criminals. The system enables the owner to monitor the vehicle while it is parked. It also helps law enforcement identify and apprehend criminals. The invention enhances the security of a parked vehicle, which provides added peace of mind when leaving the vehicle unattended.

Additionally, the system is adaptable for use with any new or existing vehicle.

The original design was submitted to the Indianapolis office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-IPL-249, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
