United Power Deploys TruckMap*Â☐ Field Solutions

-- Mobile Technology Brings ESRI ArcGISÂ☐ to the Field --

har*GIS LLC, provider of mobile and wireless technology to utilities and local governments, announced that United Power, Inc. completed deployment of the TruckMap*Â☐ software suite. Field crews and office personnel have instant, handheld access to United PowerÂ☐s entire customer information system, CAD drawings, and ESRI ArcGISÂ☐ facilities databases.

([PRWEB](#)) November 17, 2002 -- United Power, a Touchstone Energy partner, is a rapidly growing electric co-op. Field crews use the new TruckMap* Field Information SystemÂ☐ for rapid data retrieval and field updates, ensuring that workers have current information regarding the status of facilities and 45,000 customers. All TruckMap* users now have current operating information regardless of their location.

Â☐After reviewing several platform providers, we chose har*GIS for their ability to rapidly demonstrate the capabilities we require now, while supporting expansion to wireless communications and GPS navigation,Â☐ stated Larry Hepp, Director of Operations for United Power.

Remarkably, har*GIS LLC delivered this Â☐all-in-oneÂ☐ solution in less than two months by integrating their standard software products with existing data. The new system completely replaced an outdated custom application using CAD browser technology.

The TruckMap* deployment included a variety of existing Microsoft WindowsÂ☐ laptops as well as new Windows XP Pen TabletÂ☐ computers. TruckMap* also provides the same functions on low-cost Windows PocketPCÂ☐ and Handheld PC ProfessionalÂ☐ computers.

About har*GIS, LLC

Privately held, har*GIS LLC provides mobile productivity systems for field services organizations. By integrating handheld computing, wireless communications, and location-based services, har*GIS delivers Â☐Gloves OnÂ☐Â☐ applications that give field crews the information and support they need, when they need it. har*GIS LLC is a Windows Embedded Partner, an ESRI business partner, and is an authorized reseller for Trimble Navigation Ltd., Navigation Technologies Inc., and Richochet Networks, Inc.
