

## **Lincoln Town Car Engines Now Sold to the Public at EnginesforSale.org**

*Lincoln Town car engines are now sold to the general public at EnginesforSale.org. This company now offers its preowned vehicle engines in the Ford lineup for direct sale to car owners to provide a replacement V8 engine for a discounted price.*

Houston, Texas ([PRWEB](#)) January 03, 2013 -- The EnginesforSale.org company announces the sale of the Lincoln Town Car engines to the general public. This new offering is part of a new growth period for this preowned engine seller online. This offering of the Ford produced 4.6 engine is designed to help car owners and to those that require a secondary market motor for replacement. More information about this incentive can be found online at <http://enginesforsale.org/lincoln/used-lincoln-town-car-engines>.

Ford Motor Company has invested into its luxury Lincoln brand to help this series become known worldwide. Several models have been introduced since the changeover in the early 1990s. The Town Car is one example of a luxury vehicle that offered performance as well as style. Millions of these vehicles were sold and those still using this vehicle can now seek out a replacement motor online for a discount price.

An engine that is purchased on the secondary market typically receives no warranty protection for wear and tear. The high mileage that some editions can have is one reason for the lack of protection that is available. Third party warranty companies rarely extend coverage to units that reach a certain mileage point.

To help assure all buyers, the EnginesforSale.org company now offers a parts warranty with each sale made online or offline. This parts warranty is the first line of defense against a problem with a preowned motor.

The launch of the company website has helped to introduce more buyers to the current inventory that is offered for sale. One of the recent additions to the website is daily updated pages. One detail page is now created for every motor that is added to the company inventory. These pages are used to supply information about each motor type to help inform the public. These detail pages are one way that this company is informing the public about the quality of each engine before sales are made.

The October relaunch of the company website has helped introduce a new customer quote system. All of the new and existing inventory that is in stock is entered into this new system for quotes. A customer that is researching pricing before making a decision to purchase can now obtain a price immediately online. This new method is a secondary option to telephone quotes that are also available.

This virtual system is now one of the first of its kind that can deliver pricing and shipment information automatically. The news announcement for the relaunch of the company website can be found at this link <http://www.prweb.com/releases/engines-for-sale-company/expands-ford-chevy-dodge/prweb10036149.htm>

### About Engines for Sale

The Engines for Sale company has helped make its mark in the auto industry by stocking a complete line of secondary market motors. This company has a talented buying staff that locates some of the lowest mileage units that can be found. The company innovations offline have helped it to invest into online innovations. The Engines for Sale company relaunched its website with upgraded inventory and new features to help make the

purchase and research process easier. This company now offers full warranty protection and no cost shipping for all buyers.
