

CarRentOnline to rent cars a lot cheaper and faster than other car rental brokers!

CarRentOnline invites future renters, loyal to specific brokers as well as those always looking for something new, to always check CarRentOnline.com before they book a car anywhere.

([PRWEB](#)) October 5, 2003 -- Recent studies reveal that popular online car rental broker CarRentOnline.com offers its cars to customers a lot cheaper than most other well-known competitors. When comparing cheapest inclusive rates for Vienna airport (Austria) and Malaga airport (Spain), best offers available were presented by Holiday Autos and CarRentOnline! Other brokers, such as Argus, Auto-Europe or Carquoteinternational, stand way behind. CarRentOnline can confirm the availability of selected vehicles usually within 13 hours, whereas Holiday Autos requires up to 48 hours to confirm the request. Naturally, those two examples cannot allow renters to think that CarRentOnline is always the best choice (although we would like you to think so). However, they do serve as a good point, reminding future renters not to forget browsing CarRentOnline.com before they book a car - there's more to it than just cheaper rentals...
