

ACS Integrates Seamlessly With Wrenchhead's On-Line Parts Catalog & Labor Guides

Mesa, Ariz. -- October. 28, 2003 -- Alliance Computer Services, a provider of automotive management software, today announced that they have successfully integrated their garage management software with Wrenchhead's on-line parts Catalog & Labor Guides. ACS has created Two applications, one a stand alone and one an integrated simple point and click solution to add parts and labor items to their Shop Controller shop management software.

Mesa, AZ ([PRWEB](#)) November 1, 2003 -- "This is very exciting for us," said Kyle Johnson, VP of Electronic Catalog for Wrenchhead Inc. "Alliance Computer Services has an incredibly powerful solution used in shops across the country. The Next Generation Solution from Alliance Computer Services will allow service dealers to select the correct replacement parts based on the selected vehicle and send the information to their garage management application using just a dial-up Internet connection."

"Wrenchhead has the fastest growing electronic application Catalog and E-Ordering products in the Industry and Alliance Computer Services is leading the charge in Next Generation Shop Management Products. We are proud to have earned their business," said Bryan Murphy, President of Wrenchhead Inc.

"The information that Wrenchhead provides fits a clear need to get parts information and labor in a timely manner. In partnering with Wrenchhead, we'll be able to offer our clients a complete and comprehensive data management solution," commented Marshall Kelly CEO of Alliance Computer Services.

About ACS
