

InventHelp Inventor Develops Sun Blocker for Vehicles (FLA-2316)

InventHelp, a leading inventor service company, is working to submit the Fun Visor to appropriate companies for their consideration and possible feedback.

Pittsburgh, PA ([PRWEB](#)) January 03, 2014 -- "Sunlight can be very distracting if it strikes you in the eyes while you are operating a motor vehicle," said an inventor from Port Saint Lucie, Fla. "Also, the ultraviolet rays are harmful and can cause sunspots and cancer. My idea blocks these dangerous rays."

She developed the patent-pending FUN VISOR to keep the sun from beaming down on the side of your face while driving. This prevents the driver from being blinded or distracted, and ensures that the driver can see the road ahead clearly.

The unit also is designed to reduce the formation of sunspots and safeguard against cancer. Additionally, the visor is adaptable for use in any vehicle, and it does not require mounting tools for installation.

The original design was submitted to the Ft. Lauderdale office of [InventHelp](#). It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 12-FLA-2316, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
