

Used 4L80E Transmission Sale Announced by U.S. Parts Retailer

Used 4L80E transmission sale is now ongoing for U.S. parts buyers at the AutoProsUSA.com company. These authentic GM gearboxes are now listed for a lowered price.

San Jose, CA ([PRWEB](#)) January 04, 2014 -- General Motors parts production in the United States and in other parts of the world has helped to contribute new technologies to the auto industry. The classic builds for transmissions remain popular as second hand units for parts buyers and the Auto Pros USA company is now upgrading its GM inventory. This company is now selling used 4L80E transmission inventory at a lower price at <http://autoprosgusa.com/used-4l80e-transmission>.

These original transmissions were first introduced by General Motors in 1991. The electronic control modules that are featured in these four-speed gearboxes helped to introduce easier shifting technologies for pickup truck owners. The Auto Pros reduced pricing for these units has been created as a 2014 incentive for purchasers of used auto parts online.

Because mileage and age can affect transmission quality, some buyers who purchase gearbox units from unreliable sources could experience quality issues. One way that the Auto Pros USA company has upgraded its inventory for the American public this year is by changing suppliers that specialize in low mileage assemblies.

"Each 4L80E gearbox that we're selling for a reduced price online has been validated for low mileage and internal quality before placed into our inventory that is shipped in the U.S.," said a source from the AutoProsUSA.com company.

The second hand parts market in the United States has benefited from more vehicle owners holding onto vehicles for longer periods of time before trade-ins are made for newer units. This has contributed to better pricing in the retail industry over the past decade.

"The Auto Pros company is taking advantage of better pricing for its customers by working closer with distributors offering tier discounts for volume parts purchases," the source included.

The new price levels for the 4L80E GM transmissions for sale online are a direct result of the new strategies in place to help second hand parts buyers in the U.S. The research system for locating the available company inventory posted at the Auto Pros USA now includes all 2014 retail pricing.

About AutoProsUSA.com

The AutoProsUSA.com company is currently promoting low prices for its auto parts inventory for sale online. This company has built a growing network of auto suppliers in the U.S. that are now fulfilling the orders placed by consumers online. The AutoProsUSA.com company provides a phone support system to parts buyers evaluating quality and condition prior to sale processing. The company partners that are now offering the parts fulfillment solutions are providing warranties with each order that is distributed. New inventory and partners are currently added to the online searchable databases each week.
