

CarComp launches a new line of multi-functional Mobile GPS Navigation Systems with large Touch Screen Displays and integrated Multimedia / Safety Features

CarComp introduces the CarComp GPS 6.8 and GPS 5.0 Mobile Navigation Systems. These mobile GPS units have the largest Touch Screen Displays on the market. They are also equipped with integrated Multimedia and Safety Features that allow them to be transformed into a Multimedia System, Parking System, and large size PDA.

([PRWEB](#)) December 5, 2003 --The new multi-functional Mobile GPS Systems from CarComp are an exciting development in the Navigation System market. The CarComp GPS 6.8 and GPS 5.0 are the first mobile GPS Systems with large 6.8" and 5.0" Touch Screen displays for easy viewing. They are portable, easily installed and can be transferred from one car to another in just seconds using the specially designed holder.

They are also the first systems with integrated Multimedia and Safety features. The inputs for AV (DVD /MP3 Player), Rear View Camera (CCD), GPRS/GSM Modem (Internet/ Data Download) allow the units to be used as a Multimedia System, Parking System or as a large size PDA.

With a touch of the Function button you can : Navigate using the GPS system, watch movies on the large 6.8" Touch Screen display, back out of tight parking spots using the Rear View Camera , Check emails / Send data , or use the unit as a PDA(Windows CE) with Flash Card Reader.

The GPS 6.8 and GPS 5.0 can run any programs designed for Windows CE operating systems. The system contains a 32 Bit RISC CPU 200 MHZ, 64 MB SDRAM , 32 MB Rom. Maps of Europe or North America are available on Compact Flash Card and other software can easily be used with the systems. The units come in a stylish carry case with GPS Antenna, Holder, 12 Volt Cigarette adapter, Compact Flash Card with Maps of Europe or North America, 220 Volt Adapter
