

InventHelp Inventors Develop Improved Way to Put on Edge Protectors (ORD-2294)

Based in Pittsburgh, Pa., InventHelp is submitting the EDGE PROTECTOR CLIP KIT to companies for their possible feedback.

PITTSBURGH, PA ([PRWEB](#)) October 16, 2016 -- "I used to drive a flatbed truck, and I hated having to climb up onto the load in order to put on the edge protectors," said one of two inventors from Kissimmee, Fla. "I thought that there had to be a quicker, easier way to get the edge protectors into position."

They created a prototype for the patent-pending EDGE PROTECTOR CLIP KIT to be slipped into position quickly and easily.

The design saves time and effort, and eliminates hassles and frustrations. It also ends the need to climb up onto the load in order to position the edge protectors. Additionally, the kit reduces the risk of slip-and-fall injuries, which is designed to enhance personal safety.

The original design was submitted to the Orlando office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-ORD-2294, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
