

Bumper Impact Absorber Invented by InventHelp Client (MTN-2387)

InventHelp, founded in 1984, is submitting this idea, the SMART BUMP, to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) November 27, 2015 -- With the growing number of cars parked on the road and in parking lots, it is not uncommon for drivers to return to their vehicles and find that the bumpers have been scratched, dented or even worse. Luckily, a creative inventor from Brooklyn, N.Y., has found a way to keep parked cars out of the line of fire.

He developed the patent-pending SMART BUMP to prevent damage to the bumpers of a parked vehicle. What's more, it activates automatically with no extra effort on the part of the driver. Furthermore, it makes parallel parking easier and safer. Furthermore, it eliminates the need for costly automobile repairs. At the same time, it reduces the number of auto insurance claims, which, in turn, helps keep insurance premium rates lower. It also improves the appearance of the vehicle, for both new and older models. In addition, it is convenient, durable, effective and affordably priced.

The inventor's personal experience inspired the idea. "I had experienced damage to the bumpers of new cars on more than one occasion and wanted to prevent that from happening again," he said. "Since this device is just as helpful in keeping older cars looking like new, I thought it would appeal to a wide market."

The original design was submitted to the Manhattan office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-MTN-2387, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
