

## **InventHelp Inventor Designs Vehicle Safety System (MTN-2447)**

*InventHelp, founded in 1984 in Pittsburgh, is submitting the BACKSEAT REMINDER to companies in the hopes of a good faith review.*

PITTSBURGH, PA ([PRWEB](#)) November 27, 2015 -- An inventor, from Brooklyn, N.Y., thought there needed to be a safe way to remind drivers to check the backseat for young passengers before exiting the vehicle, so she invented the BACKSEAT REMINDER.

The BACKSEAT REMINDER helps to prevent a young child from being left behind in a vehicle. In doing so, it could help to prevent heat related injuries or death. As a result, it increases safety and it provides added peace of mind. The invention features an effective design that is convenient and easy to use so it is ideal for parents with infants and young children.

Additionally, the BACKSEAT REMINDER is producible in design variations.

The inventor described the invention design. “My design helps to prevent kids from being accidentally left behind in a car.”

The original design was submitted to the Manhattan office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-MTN-2447, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
