

InventHelp Inventor Develops Improved Vehicle Muffler (NJD-964)

One of America's leading inventor service companies, InventHelp is submitting the SMOG FREE to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) November 28, 2015 -- "Vehicle exhaust expels pollutants into the atmosphere, which produces a greenhouse effect that is dangerous to all life on Earth," said an inventor from Cresskill, N.J. "I wanted to do something to reduce our detrimental effect on the environment."

He created a prototype for the SMOG FREE, a specially designed muffler that removes almost 100% of the pollutants and particulates contained in exhaust gases. This prevents pollutants from being expelled into the atmosphere. It is designed to help reduce the greenhouse effect created by motor vehicles. This ensures that future generations have clean air to breathe. Furthermore, the muffler is adaptable for use with new and existing vehicles.

The original design was submitted to the New Jersey office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-NJD-964, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
