

## **InventHelp Inventors Develop Automotive Accessory (VET-315)**

*Pittsburgh-based InventHelp is submitting this idea, the SURE CATCH, to companies for their review and possible feedback.*

PITTSBURGH, PA ([PRWEB](#)) December 04, 2015 -- "We have lost so many things in the small space between the driver and passenger seats in our vehicle," said an inventor from Pahrump, Nev. "Tired of sticking our hands into the gap and reaching around to retrieve these items, we developed a way to prevent things from falling between the seats."

They developed the patent-pending SURE CATCH to catch objects so that they do not fall between the driver and passenger seats. The accessory prevents items from getting lost between or underneath the seats. This eliminates the need to blindly reach between or under the seats to retrieve lost items. It enables the driver to concentrate fully on the road ahead. The unit captures a variety of small items, such as cell phones, money, credit cards, pens and pencils, jewelry, etc. Furthermore, the invention is adaptable for use in any automobile.

The original design was submitted to the Las Vegas office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-VET-315, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
