

InventHelp Inventor Designs Vehicle Safety System (ALL-575)

InventHelp is working to submit the MOTION ALERT to companies in the hopes of a good faith review.

PITTSBURGH, PA ([PRWEB](#)) December 06, 2015 -- An inventor, from Gainesville, Ga., thought there needed to be a way to enhance road safety for vehicles as well as pedestrians, so he invented the MOTION ALERT.

The MOTION ALERT provides an effective way to warn drivers of approaching vehicles, animals or pedestrians while driving. In doing so, it ensures that a driver is informed of potential hazards on the road. As a result, it enhances safety and it could help to prevent accidents. The invention features an effective and reliable design that is convenient and easy to use so it is ideal for vehicle owners. Additionally, the MOTION ALERT is producible in design variations.

The inventor described the invention design. “My design ensures that drivers are fully aware of their surroundings to help prevent potential accidents.”

The original design was submitted to the Atlanta office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-ALL-575, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
