

InventHelp Inventor Designs Vehicle Safety Device (CCP-1066)

Pittsburgh-based InventHelp is submitting the CHILD HEAT ALERT to appropriate companies for their review.

PITTSBURGH, PA ([PRWEB](#)) December 09, 2015 -- An inventor, from Chicago, Ill., thought there needed to be a way to protect a young child or passenger from being left in a dangerously hot vehicle, so she invented the CHILD HEAT ALERT.

The CHILD HEAT ALERT offers an effective way to notify a driver if a vehicle interior is too hot. In doing so, it could help to prevent heat-related injuries. As a result, it enhances safety and it provides added peace of mind. The invention features a safe, economical design that is convenient and easy to use so it is ideal for vehicle owners. Additionally, the CHILD HEAT ALERT is producible in design variations.

The inventor described the invention design. “My design enhances vehicle safety by preventing heat-related injuries.”

The original design was submitted to the Chicago office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-CCP-1066, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
