

## ProMiles® Raises the Bar in Mileage Software

*ProMiles® adds complete listing of more than 1,200 TripPak EXPRESS® and TripPak SCANNING® locations to database.*

([PRWEB](#)) January 21, 2004 --ProMiles Software Development Corporation (PSDC) - President of Sales Tony Stroncheck announced today that the upcoming release of ProMiles XF will include the ability to display the location of over 1,200 TripPak EXPRESS® drop box sites across the U.S and Canada. "Our clients have been requesting the ability to locate "The Yellow Box that Delivers Data" and to incorporate that information into effective route planning and optimization decisions. We worked with TMI to provide TripPak network information, so ProMiles users now have tools that allow them to view all TripPak EXPRESS® locations and to filter their search based on the drop box pick up time at that truck stop," said Stroncheck. "Given their leadership in this market, it was logical that we include all of their TripPak SCANNING® locations too, so fleets using truck stop scanning can map that network and optimize routes." Stroncheck added.

Current ProMiles XF users will not be required to wait for new release slated for sometime in March, but will be able to add this functionality with the installation of the free ProMiles XF service pack 5, which is currently available for download on the PSDC website. Further updates to TripPak® locations are planned on a monthly or possibly even weekly basis to keep up with the fast growing coverage.

Interested parties can find more detailed information on the features of ProMiles XF by visiting the PSDC website ([www.ProMiles.com](http://www.ProMiles.com)) or call PSDC directly (800-324-8588) and ask for a free trial CD.

ProMiles Software Development Corporation, developer of the industry's Largest and Most Accurate Mileage and Mapping Database with over 931,000 miles of truck useable roads, develops various types of desktop (CD) and WEB applications such as Route/Stop Optimization, Fuel Tax Reporting, Fuel Management and Fuel Purchase Optimization. Almost every Canadian Province and the majority of US State/DOT Auditors are using ProMiles® applications for IFTA, Log Book and IRP compliance verification. ProMiles® gives the trucking industry the same tools to pre-audit their records that the government uses to perform an audit.

TMI is a premier service provider of expedited document processing and business process improvement services for the trucking industry. TMI is best known as the parent company of the highly successful TripPak EXPRESS®, TripPak ONLINE® and the fastest growing truck stop scanning network, TripPak SCANNING® fleet document management services, but also from the highly visible work of TMI-MultiMedia® - advertising agency of choice for the transportation industry. TMI is the first and only company to deliver on the dream of a paperless office, leveraging time tested, centralized processes to help fleets maintain control of mission critical proof of delivery records, bills of lading, driver expense and payroll records, receipts, logs and original shipper's documents, while providing high quality images to drive productivity and process improvement.
