

InventHelp Invention Improves Child Safety at Bus Stops (CIC-103)

A Pittsburgh-based invention company, InventHelp is submitting the POP LIGHT to companies for their potential feedback.

Pittsburgh, PA ([PRWEB](#)) October 21, 2016 -- An inventor from South Bend, Ind., wanted to a way to improve how visible her children were at the bus stop early in the morning, so she came up with this idea. Now parents and guardians can have less worry for children who must walk to and wait at bus stops in the dark.

The patent-pending POP LIGHT enhances safety for a child walking to or waiting at a bus stop early in the morning. It improves how visible the child is, which helps avoid accidents that can result in injury or fatality. As a result, it promotes peace of mind and convenience.

Featuring an easy-to-use, ergonomic and versatile design, the POP LIGHT also can be used at night.

The original design was submitted to the Chicago office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CIC-103, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
