Jeg's High Performance Chooses STR Software to Integrate Automated Fax System

STR Software was recently awarded a contract from JegÂ□s High Performance in Delaware, Oh. STR Software will implement AventXÂ® UNIX, an automated information delivery software product for faxing documents from Unix operating systems.

RICHMOND, VA (PRWEB) February 12, 2004 -Â□STR Software was recently awarded a contract from JegÂ□s High Performance in Delaware, Oh. STR Software will implement AventXÂ® UNIX, an automated information delivery software product for faxing documents from Unix operating systems. JegÂ□s will also employ AventX WebManager to monitor and manage the delivery of purchase orders and other documents over the Web. The company chose AventX UNIX for its interface with Ecometry, a catalog sales automation application.

STR Software of Richmond, Va., develops, markets and supports software products in business information delivery for host ERP applications like Oracle E-Business Suite, PeopleSoft and SAP. The company provides fax, email and Internet fax software solutions for MPE, Unix and Windows environments. For additional information, visit www.strsoftware.com.

JegÂ□s High Performance sells high performance automotive parts for car, truck, street and drag racing vehicles. For more information, visit www.jegs.com.
