

MotoTech Solutions Announces Exclusive Manufacturing and Distribution Agreement with Technical Edge

MotoTech Solutions, Inc. announced today that they have established an exclusive manufacturing and distribution agreement with Technical Edge Pty Ltd of Australia. Technical Edge, the inventor of RidgeBack PivotPegz, and MotoTech Solutions have teamed up to develop the off-road motorcycle markets only pivoting footpeg.

([PRWEB](#)) February 13, 2004 --MotoTech Solutions, Inc. announced today that they have established an exclusive manufacturing and distribution agreement with Technical Edge Pty Ltd of Australia. Technical Edge, the inventor of RidgeBack PivotPegz, and MotoTech Solutions have teamed up to develop the off-road motorcycle markets only pivoting footpeg.

“This alliance gives us the ability to revolutionize the off-road motorcycle footpeg market and deliver a product that is sure to become the standard,” said James Scala, MotoTech Solutions President.

Developed with the assistance of top international motocross riders, PivotPegz overcome the disadvantages found on standard pegs by using a patented design that allows the peg to tilt forward and backward with the natural motion of the rider’s foot. The pivoting motion coupled with the unique grip pattern of the teeth provides the rider with a stable and naturally conforming ride.

“Joining with MotoTech Solutions has enabled us to bring PivotPegz to the world and guarantee a quality manufactured product,” added Allen Smith, Technical Edge Managing Director. “I look forward to many prosperous years in the off-road motorcycle market in which together we will establish PivotPegz as the footpeg leader.”

PivotPegz are manufactured in the U.S.A and are available in stainless steel and titanium. MotoTech Solutions is the exclusive manufacturer and US distributor. Distributors have been established in Alaska, Canada, Europe, and Australia.

MotoTech Solutions, Inc. is a leader in innovative motorcycle product manufacturing. MotoTech Solutions is based in El Dorado Hills, CA.
