

Synergy Steering and Suspension Parts for Jeep Wranglers Now Offered by 4WD

Prominent provider of aftermarket Jeep parts and accessories, [4WD](#), has begun selling the Synergy brand of steering and suspension parts for Jeep Wranglers. These parts include a Steering Stabilizer Kit, Sector Shaft Support Kit, Drag Link Kit, Heavy Duty Tie Rod Kit, Heavy Duty Replacement Ball Joints and Long Arm Suspension Kit and the components are designed to increase on and off-road steering handling and performance in Jeeps.

Columbiana, Ohio ([PRWEB](#)) December 31, 2013 -- [4WD](#), leading provider of Jeep parts and Jeep accessories, has begun selling the [Synergy](#) brand of steering and suspension parts for Jeep Wranglers. These parts include a Steering Stabilizer Kit, Sector Shaft Support Kit, Drag Link Kit, Heavy Duty Tie Rod Kit, Heavy Duty Replacement Ball Joints and Long Arm Suspension Kit and the components are designed to increase on and off-road steering handling and performance in Jeeps. The kits are designed and manufactured to prevent and cure common steering issues like "death wobble," bending and breakage of sector shafts, and premature failure of factory tie rods and tie rod ends.

“Synergy Manufacturing is excited to announce the addition of our steering and suspension product line to the 4WD family,” says Dave Schlossberg, President and CEO of Synergy Mfg. “We have had tremendous success with 4WD since our initial product launch at the beginning of the year. We look forward to our growing relationship with 4WD and their awesome customers!”

One of the big steering concerns is safety and Jeep drivers with families and kids welcome the current Synergy steering kits that fit the YJ, JK Jeep applications with XJ, ZJ and TJ Jeep applications to be released in early 2014. “There’s a demand from 4WD customers for these new kits because Synergy is a reputable suspension manufacturer,” says Landon List, 4WD Jeep Merchandiser/Brand Manager. “A major problem from lifted JKs is the weak steering and worn out steering is unsafe.”

Features of various kits include CNC laser cut and formed steel, high corrosion resistant plating/powder coating finishes, and 4130 chromoly and heat treatment for optimum strength. Synergy steering kits 4WD offers include:

- High Mount Steering Stabilizer Kit
- Stage 4 Long Arm Suspension Kit
- Front Trackbar & Sector Shaft Brace Kit
- Heavy Duty 4130 Heat Treated Chromoly Tie Rod Kit
- Steering Correction Kit (HD Drag Link & Trackbar Relocation Bracket)
- Front Axle Assurance Kit (Axle Inner Sleeves, HD Ball Joints & C- Gussets)

Since 2005, Synergy Manufacturing has been a pioneer in the off-road industry by producing innovative automotive performance components. Synergy began as a premier suspension manufacturer of late model Jeep Wrangler products. Now Synergy makes a multiple array of Jeep Wrangler products including suspension/steering components, skid plates, interior accessories, storage accessories and other Jeep-related parts and accessories for enthusiasts.
