

## **InventHelp Inventor Develops Better Automotive Armrest (TOR-9007)**

*InventHelp, founded in 1984 in Pittsburgh, is attempting to send this invention to qualified companies in the hopes of a good faith review.*

Pittsburgh, PA ([PRWEB](#)) January 07, 2014 -- Truck drivers spend hours upon hours each day behind the wheel. In order to stay comfortable, they require certain amenities. An inventor from Chatham, Ontario, Canada, has created a prototype for a better armrest.

The patent-pending ARMREST BUDDIES support the driver's entire arm, relieving fatigue and providing extra comfort. This helps the driver to stay focused and alert, which is designed to enhance roadway safety. Additionally, the device is easy to install and adaptable for use with all makes and models of trucks, RVs, etc.

The inventor's professional experience inspired the idea. He stated "As a truck driver, I made a prototype of this invention for my own personal comfort; it has proven to work extremely well. This armrest supports the driver's entire arm."

The original design was submitted to the [Toronto office of InventHelp](#). It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 12-TOR-9007, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
