

Growing Automobile Production in Developing Countries Drives the Market for Tubeless Tires, According to a New Trend Report Published by Global Industry Analysts, Inc.

GIA announces the release of a trend report on Tubeless Tires. Manufactured with airtight valve assemblies, Tubeless Tires are projected to witness robust growth supported by growing automobile production in developing regions such as Asia-Pacific, and Latin America.

San Jose, California ([PRWEB](#)) January 08, 2014 -- [Follow us on LinkedIn](#) – Tubeless tires are superior to tube tires as they prevent blowouts, which are cited as the single most popular cause for accidents. Key benefits of tubeless tires driving its adoption include enhanced safety and comfort, better heat dissipation, improved mileage, greater stability at lower tire pressures, and reduced risk of flat tires, among others. Tubeless tires additionally have the advantage of reducing the risk of damage to the tire casing and assembly in the event of flat running. Strong automotive production in developing countries like China and India is helping drive growth in demand for tubeless tires in the OEM market.

The trend report titled “Tubeless Tires” announced by Global Industry Analysts Inc., is a focused research paper which provides cursory insights into the product, future prospects, and corporate initiatives of key companies worldwide. Also covered are companies such as American Classic, Apollo Tyres Ltd., Bridgestone Corporation, Hutchinson SA, Kamaz Inc., Michelin Group, Schwalbe North America, Trek Bicycle Corporation Ltd., and Wilderness Trail Bikes Inc., among others.
