

InventHelp Invention Provides Drivers With Optimal Sun-Glare Protection (CCT-2043)

A Pittsburgh-based invention submission firm, InventHelp is submitting the SMART VISOR to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) July 18, 2016 -- "When driving east in the morning and west in the evening, you understand how difficult sun glare can be to deal with," said one of two inventors from West Harrison, Ind. "Often, existing sun visors don't do the job, so we figured out a way to correct this problem."

The SMART VISOR protects against sun glare while driving in an optimal manner. As a result, it maintains proper visibility, which helps avoid accidents, damage and fatality. The invention is easy to use and ideal for all drivers.

The original design was submitted to the Cincinnati office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CCT-2043, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
