

InventHelp Inventor Develops Redesigned Cell Phone for Automotive Safety (CCT-2055)

InventHelp is working to submit this client's idea, the SAFETY CELL, to companies in the hopes of their good faith review.

PITTSBURGH, PA ([PRWEB](#)) July 18, 2016 -- "I wanted to do my part in helping to reduce the number of injuries and deaths caused by drivers who are too distracted by their cell phones to pay attention to the road," said an inventor from Coshocton, Ohio. "This led me to develop a safer, more responsible cell phone."

He developed the SAFETY CELL, a modified cell phone that cannot be used while the vehicle is in motion. This keeps the driver from being distracted by texts and calls. The phone ensures that the driver remains focused on the road ahead. It is designed to enhance automotive safety by reducing the incidence of collisions. The invention provides added peace of mind. Furthermore, it is easy to use.

The original design was submitted to the Cincinnati office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CCT-2055, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
