

World Patent Marketing Success Group Introduces the Saving Lives Sensor, a Device That Will Make It Easier to Watch Out For Motorcycles on the Road

World Patent Marketing Reviews A New Technological Invention. Will the Saving Lives Sensor Be the Next World Patent Marketing Low Cost Success Story?

Miami, FL ([PRWEB](#)) July 19, 2016 -- World Patent Marketing, a vertically integrated manufacturer and engineer of patented products, announces the SLS, or Saving Lives Sensor, a small device that will prevent motorcycle accidents.

"The Vehicle Safety industry in the U.S. is worth \$153 billion per year," says Scott Cooper, CEO and Creative Director of World Patent Marketing. "The SLS is a device that will save many lives and become standard equipment for motorists."

"Many lives are lost every day due to motorcycle accidents," says Jerry Shapiro, Director of Manufacturing and World Patent Marketing Inventions. "This device will be essential in cutting down those numbers."

The Saving Lives Sensor is a Bluetooth-enabled device that detects nearby motorcyclists and alerts the driver of their presence. It uses both lights and voice commands to alert the motorist that there is a bike nearby. This device also overrides all cell phone, radio, and other smart device signals in the area until it receives a response. Once the response is received, the user will be aware that there is a motorcyclist in the vicinity and they'll both be safer.

"Motorcyclists every day in this country have to save themselves from us," says inventor Kim D. "Simply because we are so wrapped up in our daily lives we desensitize ourselves to our surroundings and become unaware of the presence of other beings or vehicles. I am the Founder and Inventor of (SLS) Saving Lives Sensor which controls the interaction between a motor vehicle operator and a motorcyclist. It accomplishes this by alerting the other with lights and voice commands that it is in close proximity. Once the acknowledgment is received, the safety of the rider and motor vehicle operator are ensured and lives are saved."

Joan Wilson, a bank teller from Illinois, had this to say about SLS: "I know what it's like to lose someone in a motorcycle accident. They're too dangerous. Anything that can increase motorcycle safety in any way is a win in my book."

The SLS is a car safety invention that will help prevent accidents with motorcyclists.

ABOUT WORLD PATENT MARKETING

World Patent Marketing is an innovation incubator and manufacturer of patented products for inventors and entrepreneurs. The company is broken into eight operating divisions: Research, Patents, Prototyping, Manufacturing, Retail, Web & Apps, Social Media and Capital Ventures.

As a leader in patent invention services, World Patent Marketing is by your side every step of the way, utilizing our capital and experience to protect, prepare, and manufacture your new product idea and get it out to the market. Get a patent with World Patent Marketing and the company will send representatives to trade shows every month in order to further advocate for its clients. It is just part of the world patent marketing cost of doing

business.

World Patent Marketing Reviews enjoy an A+ rating with the Better Business Bureau and five star ratings from consumer review sites including: Consumer Affairs, Google, Trustpilot, Customer Lobby, Reseller Ratings, Yelp and My3Cents.

World Patent Marketing is also a proud member of the National Association of Manufacturers, Duns and Bradstreet, the US Chamber of Commerce, the South Florida Chamber of Commerce, the Greater Miami Chamber of Commerce, Association for Manufacturing Excellence, and the New York Inventor Exchange.
