

Inventor and InventHelp Client Develops Safety Accessory for Motorists with Children or Pets (NAV-902)

InventHelp, based in Pittsburgh, is submitting the AT&S SYSTEM to companies for their consideration and potential feedback.

PITTSBURGH, PA ([PRWEB](#)) July 23, 2016 -- "I have seen too many news reports about the tragic deaths of children who were left unattended in vehicles on hot days," said an inventor from Decherd, Tenn. "I wanted to put an end to this while also protecting the vehicle itself from theft and damages."

He developed the patent-pending AT&S SYSTEM to prevent a child or pet from being left behind in a vehicle. The unit safeguards child or pet from injury and death. The system is designed to enhance personal safety. This offers added peace of mind to parents and pet owners. It also ensures that the equipped vehicle is not vandalized or stolen. Additionally, the invention is adaptable for use with any new or existing vehicle.

The original design was submitted to the Nashville office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-NAV-902, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
