

## **InventHelp Inventor Develops Means of Targeting Expired/Rejected Stickers (BMA-4620)**

*InventHelp, a leading invention company, is submitting the VIOLATOR/CRIMINAL TRACKING SYSTEM to companies for their review.*

PITTSBURGH, PA ([PRWEB](http://www.PRWEB.com)) July 30, 2016 -- "I had a rejection sticker, and I drove around for an entire year without the authorities identifying my vehicle," said an inventor from Worcester, Mass. "I thought that there had to be an easier, more efficient way for police to identify and locate those vehicles that should not be on the road."

He developed the patent-pending VIOLATOR/CRIMINAL TRACKING SYSTEM to help police to identify and locate vehicles with a rejection sticker or expired inspection sticker. The unit saves time and effort in tracking down motorists who are violating the law. It promotes responsible vehicle ownership and ensures that municipalities can collect the fees required for vehicle inspections. The accessory keeps unsafe vehicles off the road. Furthermore, it remains invisible to the motorist so that it cannot be tampered with. The invention is usable in a large range of tracking and location of offenders.

The original design was submitted to the Boston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-BMA-4620, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
