

InventHelp Inventor Develops Engine Optimizer (LCC-3120)

InventHelp, a Pittsburgh-based invention company, is submitting the TCR to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) August 03, 2016 -- "With gas being so expensive, I wanted to make engines run more efficiently so that they consume less fuel while also getting more overall power and improved fuel economy," said an inventor from Reading, Pa. "My idea enhances the functioning of the equipped engine."

He developed the patent-pending TCR to optimize engine efficiency. The accessory lessens fuel consumption and improves fuel economy. It also boosts overall power and performance. All of this saves the owner money at the gas pump and provides added peace of mind. Furthermore, the invention is adaptable for use with a variety of engines, including automotive, farm-machinery, lawn-mower and power-sports engines.

The original design was submitted to the Lancaster office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-LCC-3120, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
