

Improved Vehicle-Security System Invented by InventHelp Clients (SFO-207)

InventHelp, founded in 1984 in Pittsburgh, is submitting the WHERE'S MY CAR to appropriate companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) August 05, 2016 -- After having to use valet parking one of two inventors from Hayward, Calif., decided that there needed to be an effective and reliable way to enhance the security of a car. "That's when the co-inventor and I came up with the patent-pending WHERE'S MY CAR," he said.

This system provides optimal security for a vehicle in order to deal with vandalism and theft. It provides evidence and aids law enforcement, as well as promotes peace of mind. Easy to use and versatile, the system serves as an alternative to conventional security systems.

The original design was submitted to the San Francisco office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-SFO-207, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
