

InventHelp Invention Improves Safety for Vehicle-Riding Dogs (TOR-9529)

A leading invention submission company, InventHelp, is submitting the PAL PAD to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) August 06, 2016 -- "My dog got injured when my car stopped suddenly and he went flying onto the floor and against the dashboard," said a concerned inventor from Dorchester, Ontario, Canada. "This inspired me to design a way to prevent this dangerous problem."

The easy-to-use PAL PAD improves safety for a dog riding on a vehicle's passenger-side seat. It prevents injuries in the event of a sudden stop or impact, which avoids expensive veterinarian visits. It also avoids distraction. Overall, it promotes safety and peace of mind. The invention also can be used for other pets.

The original design was submitted to the Toronto office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-TOR-9529, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
