

## NovaCharge Launches NC-5000 Family of Commercial and Residential Electric Vehicle Charging Stations

*NC-5000 EV Chargers enable businesses to promote their brand while offering customers and employees EV charging services. Sarasota Bradenton International Airport chooses NC-5000 to offer complimentary services to travelers.*

Oldsmar, FL ([PRWEB](#)) August 02, 2016 -- NovaCharge LLC, a leading provider of electric vehicle charging solutions, today announced the general availability of the NovaCharger NC-5000 series of electric vehicle (EV) charging stations.

The NC-5000 series boasts a sophisticated, compact design, and features a customizable front panel enabling businesses to showcase their brand to its customers and employees. This level-2 EV charger features a rugged housing and a hardened rubber charging gun making the unit ideal for all weather environments. The NC-5000 line is built for heavy usage, and is available in both wall and pole mount configurations.

“This product launch serves as a tremendous milestone for NovaCharge,” said Helda Rodriguez, President of NovaCharge. “The NC-5000 line is the perfect solution for businesses, hotels and similar organizations wanting to offer complimentary charging as an amenity to their customers and employees. It is also a differentiator, allowing businesses to brand these chargers, while promoting their commitment to environmental sustainability.”

These high performance stations rival competitive models, at a fraction of the cost. The NC-5000 line has been installed at a wide variety of customer locations throughout the U.S. over the past year.

Most recently, Sarasota Bradenton International Airport (SRQ) selected the NC-5000 charging stations, installing four units in their short term parking lot allowing customers and travelers with EVs to easily recharge their cars. The EV charging stations are complimentary for SRQ customers parking an electric vehicle in the short term lot.

“We selected the NC-5000 due its compact design and the ability to customize it to include SRQ branding,” said Rick Piccolo, SRQ’s President and Chief Executive Officer. “Providing these charging stations further supports our initiatives in integrating sustainability throughout the airport while offering our customers a stress free travel experience.”

### About NovaCharge, LLC:

NovaCharge, LLC was founded in 2008 to address the need for a next-generation electric vehicle (E/V) charging infrastructure. As a leading provider of E/V networked and non-networked charging solutions, NovaCharge is dedicated to enabling a better environment for future generations by supporting a zero-emission transportation infrastructure, offering convenient, affordable, grid-friendly charging stations that enable access across both public and private locations. NovaCharge is headquartered in Tampa, Florida, and is a Certified Minority/Woman owned business.
