

## **Tire Recappers Announces New Line of 18” and 20” Tires**

*Tire Recappers, a Nashville-based tire retread company, adds new tires to their robust inventory*

Nashville, TN ([PRWEB](#)) August 02, 2016 -- Tire Recappers, a Nashville-based tire retread company, is pleased to announce the addition of new 18” and 20” tires to the Cross Grip M/T, All Position Highway 2, and Winter Driving CM&S 2 lines. The new tire sizes will be available at [tirerecappers.com](http://tirerecappers.com).

“By adding these 18- and 20-inch key sizes, we have closed our gap on popular replacement sizes for the new three-quarter tons and single wheel ton trucks. The 15-inch sizes are still highly popular and have seen new life as a serious upgrade for the UTV market,” said Lee Ford, Vice President of Tire Recappers.

Available by the end of the summer, the Cross Grip M/T features an aggressive mud terrain tread design, with staggered self-cleaning lugs that help reduce road noise. New additions to the Cross Grip M/T Line include:

P235/75r15  
LT30/9.50r15  
LT275/70r18  
LT275/65r20

Tire Recappers is also pleased to add the LT245/75r16 to the All Position Highway 2 line. The popular tire size, used by many service fleets, is a welcome addition to the extensive Tire Recappers line-up. The LT245/75r16 will be available later this summer.

New additions to the CM & S 2 winter tire line (available Fall 2016) include:

P205/55r16  
P215/50r17  
P215/55r17  
P225/50r17  
P225/55r17  
P225/65r17  
P235/65r17

“The winter tires are a niche market, our high void tread design features tread siping for increased traction in slushy snow and is studdable for hard-packed snow and ice,” said Ford.

Retread tires provide a cost-effective and eco-friendly alternative to brand new tires. Drivers and fleet managers who choose retread tires save an average of 30 to 50 percent off the new tire price. In addition, retread tires protect the environment by conserving millions of gallons of oil each year.

Tire Recappers proudly produces some of the highest quality tire retreads on the market. Each tire undergoes a thorough inspection process to ensure it meets the company’s performance, safety and quality standards.
