

New Fleet Management Partner Available Through NPP

MIFleet by DCS provides best in class SaaS based GPS Fleet Tracking Platform

Seattle, WA ([PRWEB](#)) August 01, 2016 -- National Purchasing Partners has signed an agreement with Direct Communications Solutions (DCS) to offer its members MiFleet, a SaaS based GPS Fleet Tracking Platform.

DCS is a proven thought leader in developing and delivering best in class cellular based solutions for the Internet of Things. The solutions are a confluence of several major data trends including SaaS, IoT, Mobility, Cloud, Platform and Data Analytics. The MiFleet tracking solution gives business owners the ability to manage their mobile assets and make their fleets more efficient. MiFleet provides companies real time mobile visibility of their fleets through tablet and smartphone applications available from Apple and Google stores.

“MiFleet’s technology is cutting edge, and is a practical solution for our members with fleet management needs,” says David Salberg, NPP’s Managing Director of Partner Programs. “It’s exciting to bring another great product into the NPP Internet of Things division.”

“DCS is excited to be partnering with NPP in offering NPP members with a powerful platform to make their fleets safe, secure and efficient” said Chris Bursey, CEO Direct Communication Solutions. “Our monthly subscription based service allows business owners to have an affordable, best in class fleet tracking platform that will have immediate impact on making their fleet and business more efficient “

NPP helps thousands of companies save time and money through its discount pricing contracts. DCS is the latest of NPP’s technology offerings in its Internet of Things portfolio, solutions designed to help companies run more efficiently.
