

Bond Limousine Launches Corporate Transportation Mobile Phone Application

Bond Limousine introduces its all new mobile application and allows clients to set up accounts, make and change car service reservations with just a few smartphone swipes and taps. [The app](#) provides travelers with exact trip prices and clients have the option to pay fares right on their phones.

Bridgeport, Connecticut ([PRWEB](#)) August 09, 2016 -- [Bond Limousine](#) now offers clients a mobile application that allows them to make chauffeured car reservations from their phones. Travelers receive Bond Limousine's same top-quality service, but they can now do so more conveniently. The mobile application, which is available for download from [iTunes](#) and [Google Play](#), incorporates some of the latest in transportation management technology. The Bond Limousine mobile application is for anyone who wants to manage their transportation experience from anywhere.

Bond Limousine's [mobile application](#) incorporates a number of modern features that are designed to make travel to and from airports as seamless as possible. The application allows clients to set up accounts and make car reservations with just a few smartphone swipes and taps. There are no surprises when clients use the Bond Limousine mobile application: Bond Limousine provides travelers with exact trip prices, and clients have the option to pay fares right on their phones. The introduction of this mobile application is just one more way that Bond Limousine demonstrates its commitment to customer care and excellent service.

The Bond Limousine mobile application offers a level of transparency that clients want and deserve while traveling. Bond clients rarely have to wait for their professionally chauffeured car to pick them up because drivers arrive 15 minutes prior to pick up per company policy. Clients can use the mobile application to receive status alerts about drivers' locations, and they can even track their drivers' routes on digital maps. Travelers who use the Bond Limousine mobile application gain better control over their schedules and reduce a great deal of the stress that is so commonly associated with business travel.

Bond Limousine is already well known for its exemplary service, comfortable vehicles and safe and reliable drivers. A quote from a loyal customer and frequent traveler said it best: "I have been a Bond Limousine business travel client for 10 years. I fly twice weekly, and Bond has never let me down." The mobile application will give clients the flexibility to manage transportation reservations according to their unique schedules. Clients can even set and update vehicle preferences through the application to customize their travel experiences.

Bond Limousine, which was founded in 1997 by Earl Mellow Jr., is a regional leader in professional chauffeured transportation. It features experienced drivers, late-model vehicles and a 24-hour dispatch office. The company's success in Connecticut allowed it to recently expand its services to clients in Las Vegas and Los Angeles.
