

Inventor and InventHelp Client Designs Safer and More Convenient Way for Drivers to Use Cell Phones (SFO-185)

A leading inventor service company, InventHelp is submitting the SAFE CALL to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) August 13, 2016 -- Using and looking for cell phones while driving distracts drivers and can result in tragic and damaging accidents. In order to reduce this danger, an inventor from San Jose, Calif., thought of the SAFE CALL.

Versatile, easy to use and producible in design variations, this device enables a driver to use a cell phone in a safer and more convenient manner. This eliminates the need to search for a missing or out-of-reach phone in order to reduce distractions. As a result, it helps prevent injurious, fatal and/or damaging accidents.

The original design was submitted to the San Francisco office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-SFO-185, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
