

## **InventHelp Inventor Develops Enhanced Safety Cone (HLW-1531)**

*Pittsburgh-based InventHelp is submitting the SAFETY CONES to applicable companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) August 15, 2016 -- "I own an asphalt company, and I had a driver crash into my machinery," said an inventor from Bonita Springs, Fla. "I thought that if we had more visible safety cones in position, the driver could have avoided the collision. I devised these cones so that they could be seen easily."

He created a prototype for the patent-pending SAFETY CONES to be easily visible to motorists and others. The cones help protect lives and property. The attention-getting appearance enables drivers to avoid collisions with equipment and workers. It can be seen clearly in all conditions. Furthermore, the cone is designed to improve safety for personnel completing road work.

The original design was submitted to the Hollywood/Miami office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-HLW-1531, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
