

## **New Release of D3 Automotive Designs Double XCB-C to increase torsional stiffness and increase chassis rigidity.**

*D3 Automotive Designs has created the best X-Brace on the market for the EP3 and DC5 chassis.*

([PRWEB](#)) February 25, 2004 --D3 Automotive Designs have been working hard to bring you the finest X-Brace on the market today for your DC5 and EP3. This newly redesigned double x-brace is constructed out of 4130 chrome-moly, tig welded, and zinc plated for a beautiful finish. The D3 Double X-brace is the first of its kind and covers a span of 37.5" x 36" x 3", giving you maximum coverage underneath your vehicle while locking onto 6 structural mounting points on the vehicle. All of our chassis components come with our money back performance guarantee and a lifetime warranty on all craftsmanship. Our components are put to the test on the race track and WILL lower your lap times, GUARANTEED.
