

INTOX PRO Invented by InventHelp Client (KSC-1137)

InventHelp, a leading invention submission firm, is submitting the INTOX PRO to interested companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) December 10, 2016 -- “I work in law enforcement and I thought there had to be a better way to detect and determine intoxication levels during a traffic stop,” said an inventor, from St. Joseph, Mo., “so I invented the INTOX PRO.”

The patent-pending INTOX PRO provides an easy and effective way to detect THC intoxication levels in real time. In doing so, it offers a more efficient alternative to traditional detection methods. As a result, it saves time and it eliminates the need to wait for test results. The invention features a portable design that is convenient and easy to use so it is ideal for police and law enforcement. Additionally, the INTOX PRO is producible in design variations.

The inventor described the invention design. “My design eliminates the need to wait for test results to come back from the lab.”

The original design was submitted to the Kansas City office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-KSC-1137, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
