

Inventor and InventHelp Client Develops Protective Accessory for Parked Vehicles (CIC-217)

InventHelp, a leading inventor service company, is submitting the DENT STOPPERS to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) December 18, 2016 -- "Our cars are parked very close together in the garage, so when my wife opens her door, it sometimes contacts my car, leaving dents and dings," said an inventor from Lynwood, Ill. "In order to prevent such damages, I came up with this protective accessory."

He created a prototype for the DENT STOPPERS to create a non-permanent barrier between two parked vehicles. The unit prevents an opened door from denting or scratching the equipped vehicle. This safeguards the vehicle from harm, which reduces the need to have the vehicle professionally repaired or repainted. The invention is adaptable for use with any new or existing vehicle. Additionally, it is easy to set up and take down.

The original design was submitted to the Chicago office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CIC-217, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
