

The Wheelman is here in Michigan! A unique new invention that promises to be the next rage in extreme sports.

The Wheelman, off-road, Hubless vehicle for your feet! When the snow is gone and you miss your snowboard, take a ride on a Wheelman! This motorized two-wheeler that you stand on sideways will give you the ride of your life!

([PRWEB](#)) April 7, 2004 -- Brand new on the extreme sports scene is the incredible Wheelman, off-road motorcycle for your feet. This 50lb. marvel of engineering will go over any terrain carrying it's passenger at speeds of up to 20 mph! Ridden like a snow-board, or surfboard, this indestructable hubless-wheeled board is sure to be the next rage. With no seat or handlebars, only a handheld throttle and brake, it won Time Magazine's "Invention of the Year" in 2002, and is now in the top six new sports products for 2004 by S.G.M.A. and was seen at this years Supershow in Orlando, FL.

It has been seen on CNN, Ripley's Believe it or Not, and at the Supercross on April 3rd at the Pontiac Silverdome. Invented by an Australian and perfected by German engineering, the Wheelman has re-invented the wheel. It is the first "hubless" wheeled vehicle in production anywhere in the world.
