

Rolling Thunder Metal Works Inc. Releases Signature Series Lifetime Guaranteed Metal Shaping Tool Line

Rolling Thunder Metal Works Inc. officially released its newest Signature Series Lifetime Guaranteed T-Dolly sets today. These are the first sets of tooling in the Signature Series Lifetime Guaranteed tool line.

Palatine, IL ([PRWEB](#)) April 8, 2004 -- Rolling Thunder Metal Works Inc. officially released its newest Signature Series Lifetime Guaranteed T-Dolly sets today. These are the first sets of tooling in the Signature Series Lifetime Guaranteed tool line.

“Each one of these T-Dollies is hand crafted and hand finished,” said Barry Nielsen, President, Rolling Thunder Metal Works Inc. “which produces a tool of uncompromising quality that is really worthy to carry an Unconditional Lifetime Guarantee.”

Each T-Dolly is built from 4140 cold finished billet steel, ground and polished to a mirror finish. The heads are fully TIG welded to the handles. What really sets them apart from the other T-Dollies on the market is the four half inch mounting holes in the handle. These mounting holes allow the craftsman to solidly bolt the T-Dolly to the edge of a workbench or stand at various heights and directions. The two lengths of the T-Dollies heads, six inch and twelve inch make them versatile for on or off vehicle use.

The Signature Series T-Dolly Sets can be viewed and ordered online starting at \$58.99 at <http://www.rollingthundermetalworks.com>

Rolling Thunder Metal Works Inc. is a Palatine, IL custom metal fabrication shop specializing in custom metal fabrication tooling, and metal shaping for all types of cars, bikes, and trucks.
