

Fewer Oil Changes Now a Reality for Most Car Owners

FORT WORTH (April 19, 2004) - Forget changing your oil every 3000 miles (5000 km) or 3 months! You can now go 9000 miles (15000 km) or 1 year (whichever comes first) between oil changes thanks to break-through technology developed by Lubrication Engineers, Inc.

FORT WORTH, TX ([PRWEB](#)) April 21, 2004 -- Forget changing your oil every 3000 miles (5000 km) or 3 months! You can now go 9000 miles (15000 km) or 1 year (whichever comes first) between oil changes thanks to break-through technology developed by Lubrication Engineers, Inc. This innovative 5W-30 engine oil is radically changing the way people service and maintain their vehicles, saving money, time and the environment. By tripling the working life of your oil, you are guaranteed to be able to go 9,000 miles (15000 km) under normal driving conditions. You will need to change the oil sooner if you are driving in a dusty environment or if you are driving short distances where the engine oil doesn't reach normal operating temperature for at least 30 minutes.

Drive longer with confidence!

The industry-leading performance of the Lubrication Engineers 8530 Monolec SPB Engine Oil (5W-30) is backed by both a warranty and a guarantee:

The Lubrication Engineers Warranty:

"Lubrication Engineers, Inc., makes a full line of quality products that have proven themselves over many years of service. We take pride in this performance and warrant the use of our products. We will assume responsibility for any failure that is directly related to failure of our lubricants to meet LE specifications. This warranty is contingent upon the fact that you as equipment owner/operator perform all the necessary maintenance on the unit as specified by the equipment manufacturer. Lubrication Engineers is proud of its lubricants and their performance. We stand behind our reputation as being the Leaders in Lubricants."

The Lubrication Engineers Guarantee:

"No other brand of petroleum lubricating oil whatsoever, regardless of price, will be found superior in condition to Lubrication Engineers products at the end of any given period of use."

Lubrication Engineers 8530 Monolec SPB Engine Oil (5W-30) meets or exceeds gasoline engine manufacturers' specifications: API SL (Energy Conserving), ILSAC GF-3, Ford WSS-M2C205-A, GM 6094M, and has been proven to lower wear by ASTM D-2670 testing.

Since 1951, Lubrication Engineers, Inc. (www.le-inc.com) has manufactured and marketed a comprehensive line of innovative industry-leading premium lubricants. With a massive lubricants manufacturing facility in Wichita, Kansas and distribution in over 50 countries worldwide, Lubrication Engineers takes pride in their reputation as technology leaders in the lubrication industry.
