

Kit Allows for Easy Tire Air-Stem/Sensor Valve Repair - Designed by InventHelp Client (LGI-1665)

Pittsburgh-based InventHelp is working to submit this client's idea, the TPMS Repair Kit, to applicable companies for their review.

Pittsburgh, PA ([PRWEB](#)) January 09, 2014 -- Even though a tire's air stem seems like a small matter in regard to repairs, replacement requires both a new stem and a new sensor valve. "I wanted to provide a way to avoid having to replace a tire sensor valve when the stem and/or valve becomes damaged," said an inventor and auto technician from Rosedale Queens, N.Y.

To meet this need, he designed the patent-pending TPMS Repair Kit, which provides an easy way to repair the broken air stem/sensor valve of a tire. It eliminates the need for replacement, which saves money and avoids downtime. Easy to use, compact and durable, it's ideal for auto-repair shops and DIYers.

The original design was submitted to the [Long Island office of InventHelp](#). It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 12-LGI-1665, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
