

InventHelp® Client Patents “Urban Street Vehicle - USV” – Invention Could Provide Transportation Alternatives

Pittsburgh-based InventHelp is working to submit the Urban Street Vehicle to appropriate companies for their consideration and potential feedback.

PITTSBURGH, PA ([PRWEB](#)) August 05, 2015 -- [InventHelp](#), a leading inventor service company, announces that one of its clients, an inventor from Arkansas, has designed a vehicle that is designed to provide an alternative to existing transportation options. This invention is patented.

The “Urban Street Vehicle – USV” could protect a rider or driver from the elements, and could keep them dry and comfortable. The small vehicle could help to save on gas, and would enable an individual to navigate traffic jams and difficult terrain with ease. Designed so as not to roll over, the UV could include various entertainment options for an enjoyable ride.

The modified all-terrain vehicle features an enclosed cabin with front and rear windshields and side windows. The front windshield wraps around, helping to enhance the driver's view. Windshield wipers could be included, and the top folds up or down to make the vehicle a convertible. The USV would feature four-wheel disc brakes, and a four-wheel independent suspension. The vehicle includes a motorcycle engine, and is lower than a conventional ATV with a wider wheel base to prevent tipping. The front of the USV includes headlights and turn signals, and the rear includes taillights and turn signals. A water-cooled heater and the motor warm the cabin in cold weather, and an air conditioner cools the interior in hot weather. The interior also features a speedometer and tachometer. The exterior could be produced in various designs and can be painted to an individual's liking.

“High fuel prices inspired me,” said the inventor. “I think what everyone needs is a quick, reliable and cheap means of transportation that gets great gas mileage. My vehicle meets all of these needs.”

[InventHelp](#) is attempting to submit the invention to companies for review. If substantial interest is expressed, the company will attempt to negotiate for a sale or royalties for the inventor. For more information, telephone Dept. 09-AVZ-507 at (800) 851-6030. Manufacturers interested in reviewing additional inventions and new product ideas can contact InventHelp's marketing partner Intromark by filling out an online request to review new product ideas [here](#).
